

GREEN HOUSES *of* WORSHIP

Green Houses of Worship is a three-tiered, environmental stewardship program sponsored by the Interreligious Eco-Justice Network that grants certificates of achievement for implementing eco-friendly measures in your building and within your congregations. Green Houses of Worship has three levels, each with a checklist of sixteen items.

To complete a level, your congregation must check off at least twelve items from the checklist for that level (see inside of brochure for checklist). Upon completion of each level, your community will mail the completed checklist to IREJN. After receipt of the completed paperwork, a Green Houses of Worship representative will visit your house of worship and present your faith community with a certificate of achievement for you to display. Green Houses of Worship is done on the honor system and the program is retroactive – you can receive a certificate for work completed in the past, such as energy efficiency measures or a tree planting. It is our hope that the Green Houses of Worship program will make each community feel proud about the work that they have done, while inspiring them to take further action.

To raise awareness about the Green Houses of Worship program, we are asking for interested congregations to host an informational session and invite 5-10 faith communities from their area. However, this is not required to participate in the Green Houses of Worship program. If you have any questions or would like to host an informational session, please contact Letty Naigles at lnaigles@yahoo.com.

Please also note that the application requires the signatures of your congregation's clergy and senior lay leader.

GREEN HOUSES
of WORSHIP

Interreligious Eco-Justice Network

Complete any 12 of the steps in a column to receive recognition at that level (1, 2 or 3 green globes)

LEVEL 1 

- Devote at least 1 service annually to environmental stewardship.
- Develop a course of study based on your sacred texts that highlights the importance of stewardship of the earth
- Form a “green team” in your faith community
- Show environmental films (e.g. - Chasing Ice)
- Add ‘Green’ elements to youth group curriculums www.ctenergyeducation.com or www.irejn.org
- Include ‘Green’ column in your newsletters, bulletins, etc.
- Invite environmentally focused speakers (sources, IREJN, CT Conf Eco Team) www.irejn.org
- Run a weatherization campaign for individual homes through the Home Energy Solutions program at Energize CT
- Keep radiators/heating ducts/refrig coils clean
- Make environmental/conservation resources available to members
- Recycle paper/bottles/cans
- Put office machines on power strips and unplug rarely used appliances
- Reduce hot water temp to 120 degrees
- Use low impact paper products
- Flexible item : _____
- Flexible item : _____

For a Flexible item, you can describe an activity not listed or substitute an item from a list to the right of the list you are completing.

LEVEL 2 

- Install and use programmable thermostats
- Replace incandescent bulbs with LED’s www.techniart.com
- Insulate/weather-strip pipes/walls/ceilings/doors/water heaters
- Shift communications from paper to electronic media
- Shift to reusable dishes/utensils
- Install low energy LED exit and emergency lighting/signs www.techniart.com
- Ban styrofoam from use
- Install energy efficient fluorescent lights/ballasts
- Institute “Walk/bike/carpool to services” days
- Shift to organic lawn/landscape care
- Shift to environmentally sensitive cleaning products
- Develop a car pool system for activities conducted by your faith community
- Run a weatherization campaign for individual homes through the Home Energy Solutions program at Energize CT
- Purchase ‘Clean’ electric energy for your buildings www.cl-p.com/community/environmental/clean.asp
- Flexible item : _____
- Flexible item : _____

Flexible items can also include an IREJN environmental activity/program. See the website for additional suggestions.

LEVEL 3 

- Establish a community garden.
- Complete an energy audit for your house of worship through the Small Business Energy Advantage program at Energize CT. Implement recommended energy-saving measures
- Buy ‘Energy Star’ appliances
- Install ‘low flow’ water fixtures or tankless water heaters
